Hi Barbara, would you have some time to talk later today? Maybe around 2:00 pm. Hopefully you have received my previous email...

hi doug – thanks for your email message. my understanding after our last conversation, was

that the next step that would happen would be that someone from menominee was going to circle back with the consultant for aquila resources to schedule a time to hear the presentation of the model, and that after that happened, there could be more discussion of whether there was a need to have more information. i'm not sure if my understanding is correct. let me know if this is not the case, barbara

Good Morning Barbara, has there been any further discussions or updates related to Menominee Tribe's issues on the Aquila mine and requests for GW Model information from their consultants? We have sent requests to Foth and Van Dyke and have been told the files and information requested will not be provided.

Doug

hello doug – i wanted to followup on my voicemail to you this afternoon – i'm not sure i exited your mail system correctly so that message actually recorded!

i wanted to let you know, in any case, that i followed up with peter swenson, and let him know that you and john are likely to attend the model presentation/demonstration by aquilla. we'll remain available if you need us to followup on anything.

in the meantime, i'll wait to hear from one of your attorneys for a further conversation about treaty issues.

barbara
